NEW ENERGY SAVING MINI BULLET CFL LIGHT BULBS

For Immediate Release

June 16, 2007

Las Vegas, NV- Continuing its efforts to offer the most efficient energy saving lighting products available, Bulborama announced today a new product release of four innovative Mini Bullet shaped compact fluorescent (CFL) light bulbs.

Bulborama Mini Bullet lamps allow users to directly replace 60 or 75 watt incandescent light bulbs with 13 or 15 watt CFL lamps. With the visual appearance of an oval enclosed light capsule, the bulbs are aptly named Mini Bullet for their innovative shape. Available in warm tone, soft white, and full spectrum colors, Mini Bullet compact fluorescent light bulbs have industry leading life ratings of 12,000 hours – making them an efficient way to light sockets once traditionally reserved for incandescent lamps. Mini Bullet CFL's are designed to retrofit a wide variety of 120 volt fixtures for indoor and outdoor applications with operating temperatures between minus -22°F and 122°F.

Bulborama Energy Star rated Mini Bullet compact fluorescent lamps provide up to 80% in instant energy savings, utilize superior components and circuitry, light instantly with no flicker, generate less heat than standard CFL's, and come in low profile sizes to fit a wide variety of fixtures. Using just one CFL saves \$30 or more in energy costs and minimizes pollution by preventing more than 450 pounds of emissions from a power plant over the bulb's lifetime (1).

(1) – Based on U.S. Department of Energy publications.
